ACF Associates Inc. Awarded Multi-Year Contracts from Boeing

Peterborough, Ontario: ACF Associates Inc. is pleased to announce that it has been awarded two multi-year contracts from Boeing Vancouver. These contracts are part of an Investment Framework Agreement under the Industrial and Technological Benefits (ITB) Policy. The contracts are in regard to the delivery of performance management services and in-service support optimization for Boeing’s international defence programs. Combined, the two contracts have an estimated value of \$10M USD.

ACF Associates Inc. is a privately held Canadian company owned solely by The Loomex Group Ltd., which has its headquarters at Peterborough Airport in Ontario, Canada. ACF specializes in performance management and decision-support services for the aerospace defence industry. The company’s main focus is optimizing the availability of military fleets and reducing sustainment costs.

Al Meinzinger, President of Boeing Canada, states, “As a supplier to Boeing of in-service support expertise since 2011, ACF’s innovation in performance management and domain expertise in military in-service support makes it a logical choice for this work. ACF’s innovative capability has been rolled out to support several international Boeing programs, and this investment will enhance and accelerate this implementation.”

As part of the new contracts, ACF will support the development of a Performance Management Centre of Excellence for Boeing’s international defence programs, including Canada’s Chinook program and the international programs for the Boeing P-8A fleets. ACF will also support the development of a suite of In-Service Support Information Management Capabilities that will enable effective decision support by key program stakeholders.

According to Andy Fitzgerald, Executive Vice-President of ACF Associates Inc., “Boeing’s forward-looking approach to customer satisfaction and optimization of in-service support makes it an ideal customer for our capabilities. They have been a strong impetus to our continued growth, and it is with great pride that we count them as a key customer through which ACF is reaching the international market.”
